

The ASIA Miner weekly electronic news service is supported by The ASIA Miner magazine. Together they provide you with the most powerful sought-after media keeping its readers at the forefront of mining and resources news in Indonesia, China, The Philippines, Indochina, and India's growing resource industry.

The ASIA Miner is your gateway to China and Asia's booming resources sector. It's the Asia Pacific's only bilingual (English and Chinese) mining and resources electronic news service and magazine dedicated to Asia.

It features mining projects, mine finance, governmental developments, company and product news and exclusive interviews with high profile mining personals.

For the past two years The ASIA Miner has grown to offer the latest news about Asia's new mineral exploration finds and developing mining projects and also offered a platform for companies to showcase their products and services and grow their business beyond their borders.

Conferences and trade shows throughout Asia Pacific are attended by the staff of The ASIA Miner, promoting the magazine and especially its advertisers and conducting interviews, obtaining the latest mining news and taking photographs at each event.

The ASIA Miner's goal is to give mining, service, technology and heavy equipment companies a window of opportunity to showcase their mining developments, technology and other activities to Asia's booming resource sector.

The ASIA Miner magazine gives our readers the most comprehensive information on mining, investment and company and product news across the Asia Pacific.

Companies and individuals are invited to contact The ASIA Miner about any exciting developments that offer export potential which we can showcase in our magazine both through a news story and advertising.

**READER CLASSIFICATION:** The ASIA Miner quarterly magazine and weekly electronic news reaches general managers, managing directors, directors, chairpersons, finance directors, company secretaries, chief financial officers, public relations managers, heads of department, mine managers, superintendents, longwall managers, open cut managers, human resource managers, engineers, geologists, heads of processing and materials management, bankers, analysts, commodities brokers, lawyers, funds managers, accountants and mining consultants.
